## Circo

---

There is an increasing requirement for a functionally simple light work chair for ad hoc touch down working environments. Circo responds to this with a permanently floating action and a mesh back that morphs to support the user.

These features are equally welcome in conference and meeting environments where conventional static seating may

not provide adequate movement to promote healthy sitting.

The design has been realised from the development of a complex single moulded piece and its design in essence utilises two continuous lines; one for the back and seat and one for the arms plus a supporting yoke that also integrates the tilting action.

Design by Justus Kolberg

---

### Standard Features (\*Selected models only)

Injection moulded 5 star plastic base  
60mm Castors\*  
Height adjustment and free-floating tilt\*  
Swivel only\*  
Black 3D self supporting mesh back  
Plastic Glides\*

### Optional Features

Memory return column\*  
Castors for hard and soft floor coverings  
Gas lift options

### Performance Standards

EN 16139:2013 LI  
GS Certificate  
ANSI/BIFMA X5.1:2001

## ENVIRONMENTAL

### Material Content

Components are constructed of the following

### Recycled Content

Contains up to 11.5% of Recycled Material

### Recyclability

The range is 100% recyclable

# 100%

## SENATOR 3 R'S

Senator is committed to continually improving the sustainability of all environmental aspects within our business.

To meet both international standards and our own environmental targets we apply the three R's principle

-Reduce, Reuse and Recycle.

Whilst recycling is the element which receives the most exposure it is actually

the last option available and should never be the prime target in anyone's battle to reduce waste.

It is our duty as individuals and as a company to initially attempt to **Reduce** usage. Then we should look to **Reuse** wherever possible and finally, only after these two processes have been exhausted, should we consider **Recycling**.

# -Reduce -Reuse -Recycle
