

Zenith

With a design that is so fundamentally simple it is the meticulous attention to detail that sets Zenith apart. The strict formality of its angular styling belie the inherent comfort it delivers.

The die-cast aluminium bridge in an OPAC Chrome finish allows the various materials to flow seamlessly together without deviation. The design allows for various finish combinations for the back and arms whilst the carefully tailored seat upholstery sits effortlessly on its frame. Zenith fulfils its task well as a multi-purpose chair, it stacks and offers linking as an option

Design by Martin Ballendat

DIMENSIONS

DESIGN

Martin Ballendat

Martin Ballendat studied Design at the Folkwangschule in Essen. After working for various manufacturers around Europe he set up his own studio in 1995 in Austria.

A second studio soon opened in Germany, and today 'Design Ballendat' has eighteen employees working closely with a range of clients all over the world.

Components are constructed of the following

Recycled Content

Contains up to 49% of Recycled Material

Recyclability

The range is 100% recyclable

100%

SENATOR 3 R'S

Senator is committed to continually improving the sustainability of all environmental aspects within our business.

To meet both international standards and our own environmental targets we apply the three R's principle

-Reduce, Reuse and Recycle.

Whilst recycling is the element which receives the most exposure it is actually

the last option available and should never be the prime target in anyone's battle to reduce waste.

It is our duty as individuals and as a company to initially attempt to **Reduce** usage. Then we should look to **Reuse** wherever possible and finally, only after these two processes have been exhausted, should we consider **Recycling**.

-Reduce
-Reuse
-Recycle

Zenith
