

Soul

Design by PearsonLloyd

Soul is a unique and ambitious development, designed by the award winning studio of PearsonLloyd. The design seeks to embrace the technological possibilities of structural injection moulded plastics to reinvent the ubiquitous steel cantilever chair. The concept

delivers a flexing organic form that provides true ergonomic comfort and support to its user, despite its lean appearance. The chair is sublimely delivered in a palette of contemporary colours and continues to gather admirers the world over.

Design PearsonLloyd

Luke Pearson and Tom Lloyd first met while studying Furniture Design and Industrial Design respectively, at London's prestigious Royal College of Art. They set up their multi award winning design studio in 1997.

Since then the studio has created stunning solutions for a variety of international clients from the aviation, workplace, urban design and healthcare sectors identifying and responding to shifting patterns of behaviour in contemporary life.
