

Jaicer

Design by Allermuir

There is a well trusted phrase that 'form follows function' and so it is with Jaicer. We set out to create a simply beautiful chair that was constructed entirely from wood; one of the most environmentally sustainable materials we know of.

The chair has been designed to work across a multitude of environments; be it in ad hoc use in a contemporary office, as an elegant statement in a meeting room or perhaps more obviously as a café or dining chair in a corporate or hospitality environment.

The range consists of chair, high stool and complementary tables. In addition to a broad range of finishes for the timber parts there is also the option of adding an upholstered seat pad.
