Den.

Making public spaces private

Den.

Do you remember making a Den?

Was it an edifice of sofa cushions and sheets, a cardboard box castle or a tangled tepee of branches and bracken? Those small creative structures defined a private space, a quiet retreat - a place to meet with friends...

Den is a range of acoustic work areas created to make public spaces private. With eight different styles, numerous configurations and a full array of accessories, everyone has the opportunity to build their ideal **Den**.

In any open plan work area there are times when you need to find your own space. The environment we work in has to facilitate both the privacy needed to concentrate and the space needed to collaborate. The workplace has evolved as new technology has changed our working habits. Large open spaces with shared working areas create lively exciting environments, which cultivate greater collaboration. But what happens when you need a quiet area to reflect on a budget, write an essay, hold a meeting, or even talk on the phone?

When we began to talk to people, we soon realised that we needed to locate our inner child and create a **Den**.

This brochure is all about creating the most effective environment for you to work happily and efficiently. It's about building your perfect **Den**.

Den. Panel 20

Den.

Den is your noise barrier, acoustically enhanced to separate you from the hubbub of the workplace. Den can have power, reading lights and data connectivity. Worktops can be positioned to suit your working style, and soft seating can make your Den a comfortable retreat.

Unique economical construction

Den's unique junction system enables numerous configurations to be constructed with shared components, unlike other acoustic work systems which extend their configurations by placing stand-alone units back-to-back. **Den's** modular design ensures an economical construction, which can be easily extended and reconfigured to suit your changing needs.

Acoustics

Den is an acoustically enhanced product designed to reduce noise and distractions. The acoustic performance of the panel construction has been independently tested in an acoustics research laboratory following the guidelines found in BS EN ISO 354:2003 (Acoustics - Measurement of sound absorption in a reverberation room).

A full acoustic testing report is available on our website www.oceefolio.com

Finishes

A wide range of finishes enhances **Den's** flexibility. Both plain and quilted fabrics are available with a silver or black trim line. Panels can be chosen in matching or contrasting fabrics depending on your design.

The worktops are available in Maple, White, Cherry, Walnut and Oak with a matching edge or contrasting ply or black edge. A chunky 43mm worktop is offered along with a 25mm and a chamfered 12mm.

Den.Honeycomb

Den. Honeycomb 1350mm high and 1950mm modular width, four person workstation, shown in Camira Blazer Dunhurst and Kingsmead with FourCast One chairs.

Den. Panel

Den.Panel has been created to offer free-standing acoustic panels to complement your **Den** configurations. A newly designed discreet foot neatly supports the panel without creating any trip hazards or extending the overall footprint. Both a full circle and semi-circle option are available to cater for specific needs.

Den. Panel 1500mm high 850mm modular width with stabiliser feet, shown in Camira Blazer Ulster.

Panel stabilising feet options

Stabiliser foot
Half stabiliser foot
Slide-on fixed foot

Height option

1500mm

Modular width options

650mm
850mm
1050mm

Example Configurations (mm)

850 Modular Width

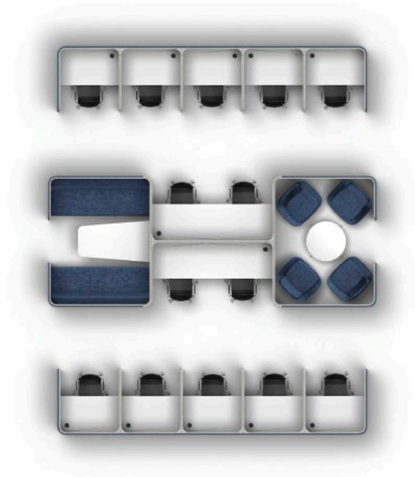

1050 Modular Width

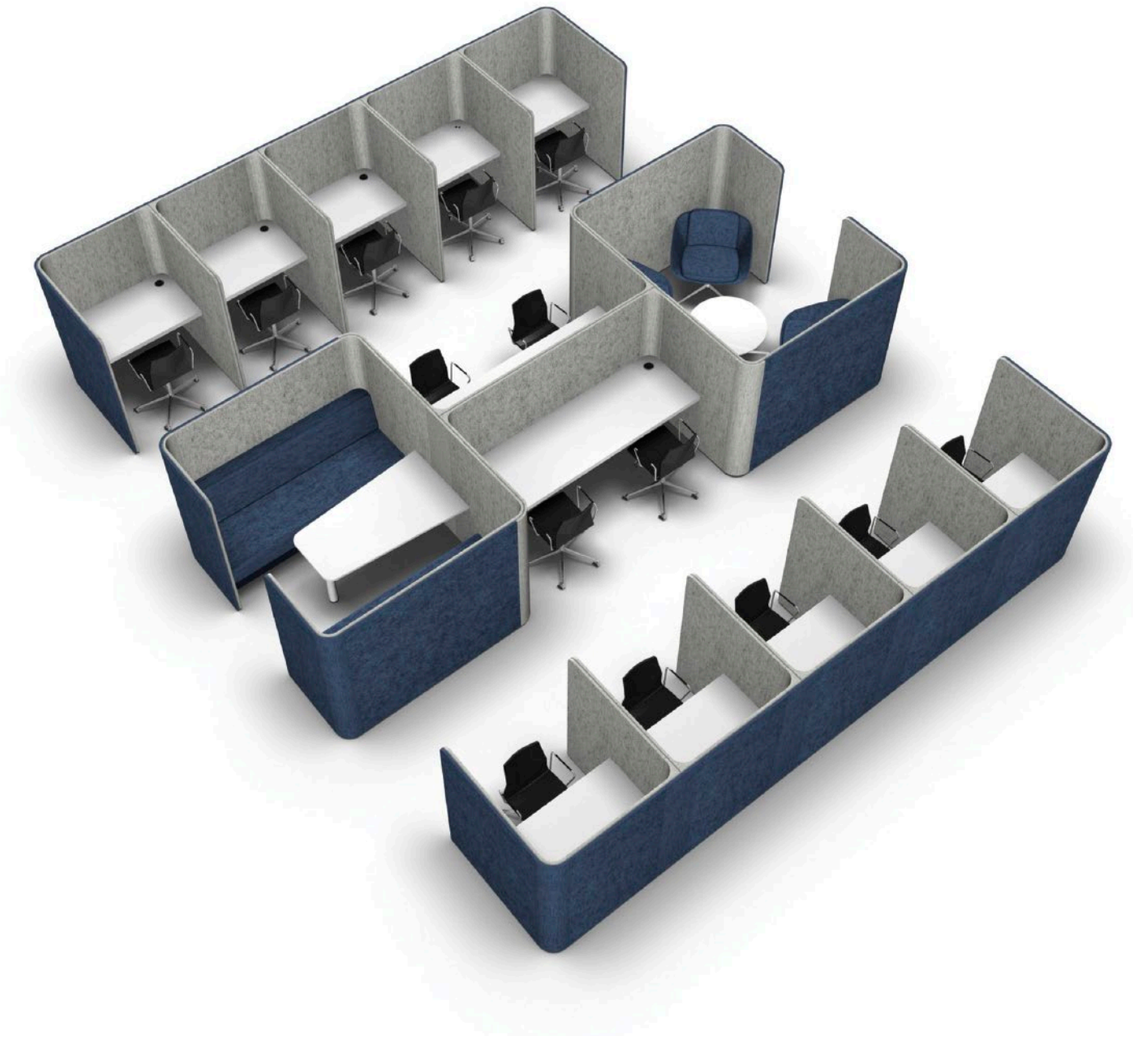

Den. Specials

The joy of creating such a flexible system is that we can create a **Den** to match your specific needs.

The **Den** team will be delighted to help you and can provide a free 3D space planning service and a detailed quotation.

Den. Accessories

Single or double coat hook

Identification plate

Wipe board available in three sizes

Soft seating arm options

Grip cups for carpet and hard floors

Range of power and data options

Wardrobe rail

Light diffuser acoustic panel

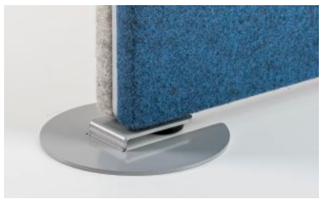

Canopy with light

*Stabiliser foot

*Half stabiliser foot

*Slide on fixed foot

* Stabilising feet are only required for Den. Panel or shell configurations

Fabric options in Camira Blazer, Blazer Lite, Blazer Quilt and Lucia

Please see our Den pricelist for full details

Den products are offered with a 5 year warranty. The warranty is subject to normal wear and tear and any movement and relocation of the units being undertaken by experienced fitters.

All of the wooden materials used are FSC sourced. The construction contains an acoustic sound-absorbing core and a full acoustic testing report is available on our website www.oceefolio.com

The flame retardant qualities of the fabric can be found by visiting Camira's website www.camirafabrics.com

Further **Den** details and resources are available on our website **www.oceefolio.com**
