

Case Study

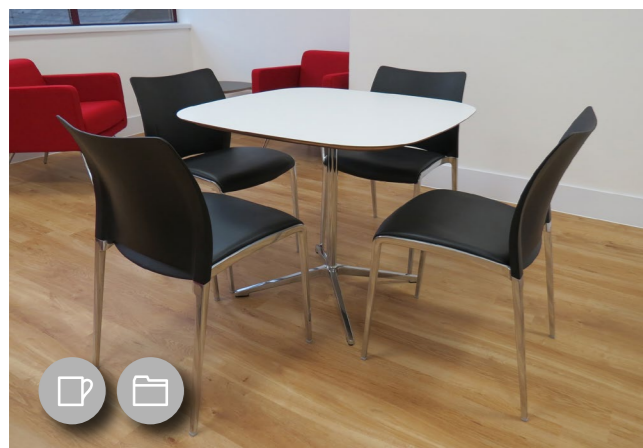

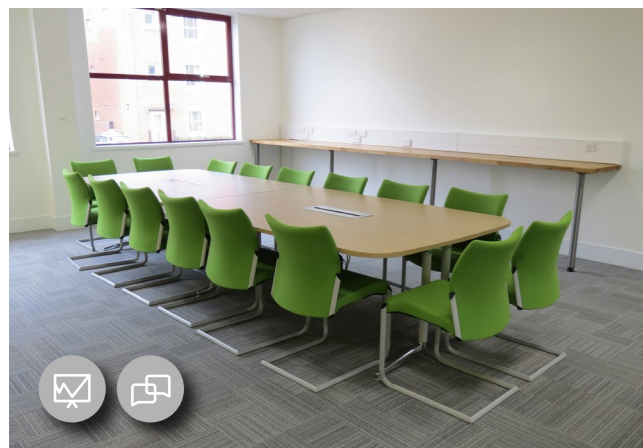

NHS Reading. - **Office Space.**

BHC Furniture is focused on the planning, managing and installation of every project it undertakes for the supply of office and healthcare furniture. It creates eye catching and well-designed offices not only to enhance the interior spaces but to work with the architecture and design of the contemporary exterior build.

“For BHC, a blank canvas for an office space in a healthcare building must be executed with attention to detail in function and practicality but nowadays must also echo the contemporary aesthetic of the exterior design.”

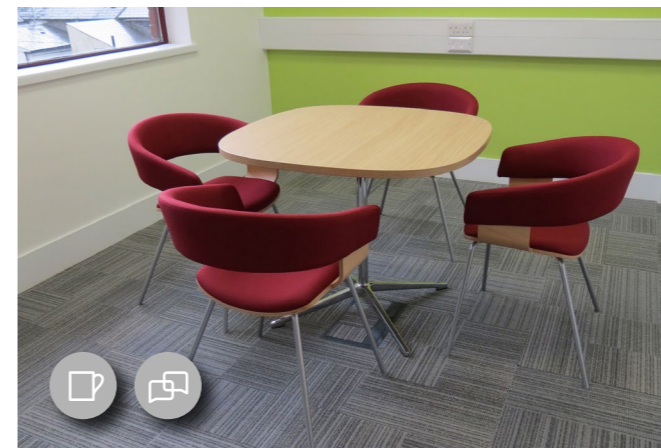

Peter Bright, MD BHC Furniture.

BHC Furniture's most recent brief was to create cost effective, functional working offices, over two floors, for NHS Reading. Space was at a premium but a modern, spacious and collaborative working interior for its staff was key. BHC's expertise in planning a project with concise space requirements came into play.

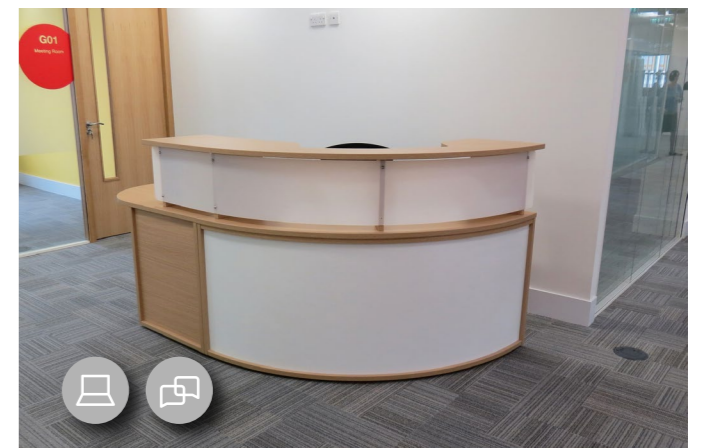

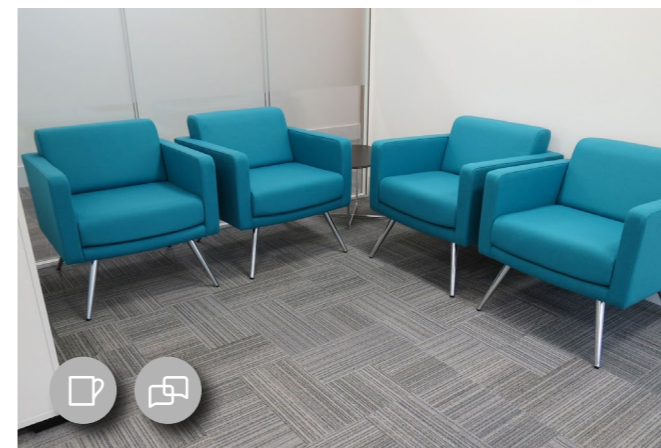

The Freeway bench desk system to support flexible working practices was specified with Clipper task chairs which offer a universal seating solution with sufficient adjustment options for all users. Meeting rooms within the NHS Reading offices were vital to support the open plan areas. Shared storage and reprographic solutions were centralised to the open plan office area to meet the requirements of the clients working practices.

BHC Furniture's management and installation process are highly regarded and it is with these efficiencies that ensured the project was successfully completed over the allocated 3 days, with pre-occupation orientation days scheduled to introduce and inform staff to the functions of the new offices and furniture there was no flexibility in completion times.

“Working within an environment that works cohesively from a design perspective, including the furniture, will be conducive to output and general satisfaction of employees”

Peter Bright, MD BHC Furniture.
