Vinyl Swatches

All our Vinyl meet the following standards and have been chosen specifically for the Healthcare Industry -

We provide an expanding portfolio of new products, suitable for end-use areas requiring extra protection such as nursing homes, assisted living, hospitals and doctors' surgeries.

Our healthcare upholstery products are the result of extensive research and development, creating market lead offerings but with the usual Camira twist. From bright colours and dementia friendly designs to the use of our own recycled polyester waste in many of the patterns, we're really out to shake things up! And of course, all our treated products are water proof, stain proof, flame proof and germ proof.

Whether you want to scrub it, wash it or just wipe it down quickly, our fabrics and vinyl's provide safe, practical and beautiful upholstery solutions.

Care and Cleaning

Do:

- Vacuum regularly to remove crumbs, dust and dirt
- Soak up spills as quickly as possible, using a dry absorbent cloth
- Clean persistent stains with a damp cloth or use upholstery shampoo
- Bleach clean using a 10% bleach solution when disinfection is necessary

Don't:

- Leave soap or cleaning fluid residues on the fabric surface
- Fully immerse or 'wet out' the fabric
- Use a solvent based cleaner
- Steam clean the fabric

Be aware, be realistic:

- The anti-microbial and flame retardant properties are permanent and not affected by cleaning.
- The finish is completely waterproof because of a protective film between the fabric and the backing.
- The stain repellent element promotes a beading action of liquid spills on the fabric surface, giving extra time to tackle the spillage. If left unattended, the fabric will eventually 'wet out' as far as the waterproof PU film. Ultimately, the quicker stains and spills are dealt with, the easier they can be successfully removed.
