

Elios

Elios is a high density stacking chair and is light both physically and visually, it can achieve a stack of 40 unupholstered chairs on its trolley, fitting through a standard doorway.

However, it is the little things it does that make the difference, the way the seat and back mouldings encapsulate the frame, the way the arm cantilevers from the back and the detachable writing tablet to name a few.

Design by

SENATOR 3 R'S

Senator is committed to continually improving the sustainability of all environmental aspects within our business.

To meet both international standards and our own environmental targets we apply the three R's principle

-Reduce, Reuse and Recycle.

Whilst recycling is the element which receives the most exposure it is actually

the last option available and should never be the prime target in anyone's battle to reduce waste.

It is our duty as individuals and as a company to initially attempt to **Reduce** usage. Then we should look to **Reuse** wherever possible and finally, only after these two processes have been exhausted, should we consider **Recycling**.

—Reduce
—Reuse
—Recycle
